Professional Services:
Implementation Services - Residencies

Residency and Staff Augmentation Options

Residency contracts provide time & materials staff augmentation for specific role(s) for a planned number of hours and duration. Resources are managed by the client and follow the client's implementation methodology. Our IRM consultant(s) work at the direction of the client on a variety of tasks and activities, which may include:

- Requirements

- Design

- Configuration

- Deployment

- Training

Residencies are a great short and long-term option for clients who wish to supplement their IRM team with qualified IRM consultants. This can be a great approach for conducting proof-of-concepts, maintaining or enhancing implemented solutions, or supplementing a client's project team with an additional IRM resource.

The Verterim team is skilled, diverse, fun and professional! We are truly passionate about IRM and enjoy sharing our expertise. Collectively, our consultants have implemented over 1000 IRM solutions. Our delivery team roles include:

- Business Analysts

- Strategic GRC Consultants

- Software Developers/Administrators

- Technical Architects, Integration Specialists

- Project and Engagement Managers
