

We Identify Compliance Gaps in your Policies

The **Policy GRC AI Agent** empowers our consultants to **quickly identify gaps between your internal policies and external regulations** such as NIST, ISO, and GDPR. By detecting inconsistencies, **recommending new policy language**, and **suggesting the appropriate placement of that language**, this agent helps streamline the process of aligning corporate policies with regulatory requirements, saving time and reducing risk.

- Identify gaps between internal policies and external regulations.
- Recommend new policy language to address identified gaps.
- Suggest where to place new language within existing policies.
- Accelerate policy alignment to meet compliance standards.
