

Accelerate Compliance with Advanced AI

Verterim's Predict is an AI-powered tool, highly trained on specific frameworks like NIST, ISO, DORA and more, that helps users **evaluate risks and issues against controls faster than ever before**. It automatically identifies noncompliance and presents the top 10 relevant controls for cross-referencing, streamlining the compliance process and aligning with multiple controls efficiently and accurately.

Predict also **simplifies compliance reporting**. Whether used as a stand-alone solution or integrated with GRC platforms, it delivers fast, accurate insights for improved compliance and risk analysis.

- Evaluate risks and issues against controls, identifying noncompliance automatically
- Understand the top 10 relevant controls for efficient cross-referencing and alignment
- Simplify reporting, enhancing risk management and compliance efforts
- Functions as a stand-alone solution or integrates with leading GRC platforms like ArcherIRM, offering fast and accurate insights

Fast, Accurate Risk Analysis and Reporting
